HAS NICOLA HAD A BOOB JOB?

► **heat's cosmetic surgeon thinks Nic has gone and had "the op"**

HERE AT HEAT, WE LOOK at pictures of celebs day in, day out... so if the look of someone's boobs changes, we're sure to notice. Which is why, when we saw this photo of Nicola Roberts (right), our boob alarm started beeping. Where on earth did *those* come from? Nicola has always been known for her naturally skinny frame, but at bandmate Sarah Harding's engagement party

last week, she wore a rather revealing dress that showed off her noticeably fuller boobs.

The 25-year-old singer's breasts – rumoured to be a tiny A cup – appear to have grown dramatically since she last showed them off in this skimpy little number (above, left) last year. Top cosmetic surgeon Angelica Kavouni thinks Nicola has possibly had some work done.

"Nicola is showing fullness

at the top of her breasts – this is very difficult to mimic, even with the best bras," says Angelica. "So it does look like she has had a breast augmentation. Her boobs look proportionate to her body size and are possibly now a D cup, full with much improved projection."

Interestingly, Nicola has spoken in the past about cosmetic surgery, and it seems she's not averse to the idea.

"I've thought about surgery," she said. "I'm one of those people who thinks if it isn't broken, don't fix it. But then, on the other hand, if you feel there's something that makes you feel shit, you might as well get it done."

We're not entirely sure about this sentiment, Nic. We liked you and your boobs how you were before, to be honest. ■ JEN CROTHERS
